

ADC24

Specifications

Switching power supply fly back type

Regulated by PWM modulation fixed frequency

Capacity output: 2Amp maximum

Capability to be used with battery backup

Wired to the « BAT » input two external battery 12v 6A/h in serial.

(* the battery must be protected by an external fuse of 3.15 Amp, in serial)

Features

Main Input voltage: 230 V 50 Hz -10% +7%

Output voltage:

Not loaded: 26.5v

Loaded: 25.6v / 2Amp

Total output voltage: 48 VA maximum

Switching Frequency: 100 KHz

Primary fuse 2 Amp

Secondary fuse 3.15 Amp

Warning

Do not open
when connected
to the main
power
